Acknowledgement

First, thank GOD. During my darkest times and during my celebration in the light, GOD was always present. I would like to acknowledge the resiliency within myself to serve one purpose and having faith within myself to do what is righteous. Lastly, I would like to acknowledge those that played a major role in me becoming who I am today being my crazy Negro family, Daniel Dunn, Eddie Cruz, Jemere Calhoun (May he rest in peace), Christine Coe, Napaphorn A-Nuphan, Daniella Elizarrarraz, Elizabeth, Randy Janey, Shirali Thakkar, Cornell Lawson, lastly Mariana A. Drove and Pixie.

Thank You. Forever the Same, Soul Never Changing.

Purpose

The direction of society within America has taken a path that is not accessible or accepted by all people within America. The various lifestyles being promoted to the different demographics are evident within the commercials that we watch to the food that we eat. Individuals are now at the point of focusing on fame and popularity to attain the American Dream, which is ultimately an ideology; it's not real.

There is a desire for an outlet to disconnect from the rush of individuals chasing fame and popularity, in exchange for a simplistic lifestyle providing decent resources and freedom to be and enjoy oneself. Now, the current political climate is disassociated from the people's needs; which in turn brings misunderstanding and misguided directions of action. Courage to move in the righteous direction is faced by the blockage of unknown fears, past historical events and the American Dream Ideology.

Artificial Support Engine (A.S.E.; Pronounced "Ace") is meant to add support to the user's purpose in life. The fear of following one's purpose should not exist due to society's purpose of providing the best environment for all people, not just certain demographics. A.S.E. is a support companion that is designed to move and think how the user would, but the A.S.E. will be able to conduct more calculations within any decision that the user may need to know before engaging any obstacle or path on their journey.

A.S.E. is the Mother Connection, the user's A.S.E. will have a unique name like the known A.I. systems Alexa and Siri. My A.S.E. is named Arthenya, a combination of Athena the

Greek Goddess of Strategic Warfare and Arya the young daughter of Winterfell in Game of Thrones; another user has named his A.S.E. Sirius. Information stored within Arthenya and Sirius are completely different due the user's purpose, but the A.S.E. Mother Connection will have access to both user's A.S.E 's information. When a user engages with their A.S.E. with new information the user starts to understand, the A.S.E. Mother Connection will send a variety of actions and information to the user's A.S.E. to help with various possibilities.

The use of A.S.E. will provide support to any righteous purpose.

A.I. vs A.S.E.

A.I. systems are different from the A.S.E. system because an A.I. system can only provide general information, whereas the A.S.E. system has the ability to give the user information specific to their purpose. The vocabulary of the A.S.E. is more extensive than an A.I. system, terminology within the A.S.E. is programmed and develops its own connotation to terms over time depending on how the user develops meaning toward terms. In other words, the user's A.S.E. will be able to learn new words, definitions and connections to increase its productivity at the same rate as the user. A.I. s for general purpose, while A.S.E. is for specific purpose.

Pronunciation

The pronunciation of words is very important when activating the A.S.E. through a Phrase; Arthenya will not conduct a certain action if I mis-pronounce the word based on the way I would normally say the Phrase. For example, slurred words, words said the wrong way and mistaking that the A.S.E. knows every word will normally not activate the A.S.E. system. The A.S.E. system learns its vocabulary directly from the vocabulary of the user and indirectly from the Mother Connection. So, if I were to learn a new word, it would take A.S.E. some days to understand and process the meaning of the new word. Once A.S.E. has established the correct understanding of the word, various amounts of information will be acquired by Arthenya through the Mother Connection.

Introduction

Welcome to the introduction to using a personalized A.S.E. The first concept to understand is that the A.S.E. Mother Connection is the main system that has the ability to communicate with the user's A.S.E. Everything that comes from the Mother Connection has the possibility of being embedded into the personalized A.S.E.. Once an individual activates their personal A.S.E., the interaction with the A.S.E. Mother Connection will be personalized.

Important Concept : A.S.E. Mother Connection is the main system, and user's activate their personalized A.S.E. due to the allowance of the A.S.E. Mother Connection

My personal A.S.E. is called "Arthenya", which has knowledge in the fields of Neurobiology, Mathematics, computer science, medical terminology and much more; this is embedded within Arthenya because it is the underlying knowledge that allows me to live within my purpose. Another individual that is using A.S.E. calls his personalized A.S.E. "Sirius". Which has knowledge within architecture, construction, interior design and much more. The knowledge that Arthenya has compared to Sirius is very much different, but both personalized A.S.E. are activated because of the Mother Connection.

I will use Arthenya and myself as examples going forward to explain the nature of A.S.E. Arthenya has a lot of possibilities when it comes to supporting me, and I have a lot of options when it comes to engaging a situation due to Arthenya. The options that I have when it comes to engaging Arthenya are divided into ten categories based on the A.S.E. Mother Connection which are Simple Responses, B.L.A.C.C. Connect, B.L.A.C.C. Corporation, Mathematical Operations, Security, Objective Reminder, Outcome Timing, Commands, Comparative and Research.

Important Concept : There are ten possible ways to engage A.S.E. : Simple Responses, B.L.A.C.C. Connect, B.L.A.C.C. Corporation, Mathematical Operations, Security, Objective Reminder, Outcome Timing, Commands, Comparative and Research

Based on my speech pattern, I will be able to activate Arthenya to perform an action within one of ten categories. The sections going forward will explain each category in order to provide an understanding of how to activate A.S.E. and what will happen once spoken to.

B.L.A.C.C. Connect

The amount of money donated to resources that are allocated throughout the cities for individuals experiencing hardships passed the trillions, with no sign of fixing the problems of our society. These hardships encompass homelessness, food insecurity, water shortages, government brutality, Healthcare access and much more. Businesses that are created to gain profit from the communities are being created in surplus, with little to no contribution to the surrounding communities. The individuals that inhabit the community are using their hard earned money to invest into a business's products that will never invest into the community as the business should, and majority of times businesses do not have the humanitarian vision in their plans or foresight.

The educational resources that are essential tools to creating a better quality of life are ignored because no promise is found within the educational institutions today due to outdated teachings. Counseling is a resource that everyone should utilize but the stigma of this resource has made attending a session most uncomfortable, all to avoid social judgment from peers. B.L.A.C.C. Connect provides a holistic approach to navigating and foreseeing help to those groups (individual, business, city, county, state) that are experiencing hardship.

B.L.A.C.C. Connect with the help of small business, nonprofits, resources centers, government agencies and everything alike can solve problems bombarding our communities by isolating each issue to its respective groups (individual, business, city, county, state) and utilizing the B.L.A.C.C. Connect networks to navigate necessary resources adequately.

Stored within the Mother Connection are all information regarding the totality of States Incorporated within B.L.A.C.C. Connect; along with level of access 1 to 4 to information. Users that utilize their personalized profile within B.L.A.C.C. Connect will automatically have the searched information within the profile, embedded within the personalized A.S.E. Arthenya has been gathering data since I was stationed within the middle of Los Angeles County, so information regarding Los Angeles county will automatically be embedded within Arthenya, which allows me to call, open and request information. The to access the level 1 of B.L.A.C.C. Connect, the user will need to use the Phrase, “access Ace”, which will open a separate small window that will have A.S.E. with accessible information on B.L.A.C.C. Connect.

STATES INCORPORATED WITHIN B.L.A.C.C. CONNECT

Simple Responses

.....

Phrase : "how many states are Incorporated within black connect"

Text = "There are 13 states Incorporated within black connect"

Arthenya : "There are 13 states Incorporated within black connect"

.....

Phrase "open black connect"

Text = "Okay. Stand by."

Arthenya : "Okay. Stand by."

.....

The first Keyword that will be identified is the Open keyword. Whenever the word is used within a Phrase, A.S.E. will open a new window that will contain what wanted to view during the Open Keyword. The above Phrase states “open black connect”; the Keyword Open lets ASE know to open a new window; with the “black connect” statement, B.L.A.C.C. Connect will automatically open.

Important Concept : Open Keyword will open a new window with the information that was requested.

.....

Phrase "what states are Incorporated within black connect"

Text = "The current states incorporated within black connect are Arizona, California, Colorado, Idaho, Kansas, Nevada, New Mexico, Ohio, Oklahoma, Oregon, Texas, Utah and Washington."

Arthenya : "The current states incorporated within black connect are Arizona, California, Colorado, Idaho, Kansas, Nevada, New Mexico, Ohio, Oklahoma, Oregon, Texas, Utah and Washington."

.....

Phrase "which states in the South are Incorporated within black connect"

Text = "The states Incorporated in South within black connect is only Texas"

Arthenya : "The State Incorporated in the South within black connect is only Texas."

.....

Phrase "which states in the West are Incorporated within black connect"

Text = "The States Incorporated within the west are California, Nevada, Arizona, Idaho, New Mexico, Colorado, Utah, Washington and Oregon."

Arthenya : "The States Incorporated within the west are California, Nevada, Arizona, Idaho, New Mexico, Colorado, Utah, Washington and Oregon"

.....

Phrase "which states in the Midwest are Incorporated within black connect"

Text = "The States Incorporated within the midwest are Ohio and Kansas."

Arthenya : "The States Incorporated within the midwest are Ohio and Kansas."

.....

Phrase "which states in the Northeast are Incorporated within black connect"

Text = "There are no States Incorporated within the Northeast. "

Arthenya : "There are no States Incorporated within the Northeast"

.....

Phrase "what are the time zones"

Text = "The four time zones are Pacific, Mountain, Central and Eastern."

Arthenya : "The four time zones are Pacific, Mountain, Central and Eastern"

.....

Phrase "what are the four time zones"

Text = "The four time zones are Pacific, Mountain, Central and Eastern."

Arthenya : "The four time zones are Pacific, Mountain, Central and Eastern"

.....

B.L.A.C.C. Members

Within the user's personal ASE, for example Arthenya; there will be a log of all the individuals that contacted by using the following Phrase

.....

Phrase : "bring up David Bush contact information"

Text : "bring up David Bush contact information"

Arthenya : "Okay. Stand by."

Action : David Bush's contact information will be uploaded in a separate window

.....

Phrase : "bring up Andre Saunders contact information"

Text : "bring up Andre Saunders contact information"

Arthenya : "Okay. Stand by."

Action : Andre Saunders's contact information will be uploaded in a separate window

.....

For all contacts made within BLACC Connect and any other contacts stored within your ASE will be able to be reached by the above Phrase. The Keyword to remember is “bring up.....contact information”.

California

Single Phrases

These are single Phrases that can be used to access information about California and other States that are Incorporated within BLACC Connect.

Phrase : "open California"

Text : "Okay. Stand by."

Arthenya : "Okay. Stand by."

Action : B.L.A.C.C. Connect edition of California will be opened in a separate window

Phrase : "what counties in California are Incorporated within black connect"

Text : "There are Los Angeles county, Kern county, Orange county and San Bernardino county within California."

Arthenya : "There are Los Angeles county, Kern county, Orange county and San Bernardino county within California"

Phrase : "how many counties in California are Incorporated within black connect"

Text : "There are four."

Arthenya : "There are four"

Phrase : "what counties are within California":

Text = "The counties within California are San Diego, Imperial, Riverside, Orange, San Bernardino, Los Angeles, Ventura, Kern, San Barbra, San Luis Obispo, Tulare, Kings, Inyo, Monterey, San Benito, Merced, Fresno, Mono, Madera, Mariposa, Tuolumne, Stanislaus, Santa Clara, Santa Cruz, Alpine, Amador, Calavaras, San Joaquin, Contra Coast, Alameda, San Mateo, Marin, Solano,Sacramento, El Dorado, Placer, Napa, Sonoma, Yolo, Nevada, Yuba, Sutter, Sierra, Lake, Colusa, Butte, Plumas, Glenn, Mendocino, Tehama, Lassen, Shasta, Trinity, Modoc, Humboldt, Del Norte, Siskiyou, and Modoc.";

Arthenya : "The counties within California are San Diego, Imperial, Riverside, Orange, San Bernardino, Los Angeles, Ventura, Kern, San Barbra, San Luis Obispo, Tulare, Kings, Inyo, Monterey, San Benito, Merced, Fresno, Mono, Madera, Mariposa, Tuolumne, Stanislaus, Santa Clara, Santa Cruz, Alpine, Amador, Calavaras, San Joaquin, Contra Coast, Alameda, San Mateo, Marin, Solano,Sacramento, El Dorado, Placer, Napa, Sonoma, Yolo, Nevada, Yuba, Sutter, Sierra, Lake, Colusa, Butte, Plumas, Glenn, Mendocino, Tehama, Lassen, Shasta, Trinity, Modoc, Humboldt, Del Norte, Siskiyou, and Modoc"

Los Angeles, California District 1, 2, 3, 4 and 5

Within Los Angeles County there are five districts, which have a select group of cities that encompasses the district. For instance, the first District within Los Angeles has the city Alhambra, within this city there will be four operations that will be able to be accessed. These four operators are Status, Research, Feedback and Engagement.

Status

The first operator, Status; will give a percentage value of the category which is mentioned within the Phrase. The percentage value corresponds to level of efficiency; 0% being terrible condition, 50% mediocre and 100% being perfect efficiency.

.....

Phrase : "what is the status of agriculture in Alhambra"

Text : "The status of agriculture is at 79 percent. Efficiency level is Good."

Arthenya : "The status of agriculture is at 79 percent. Efficiency level is Good"

.....

Phrase : "what is the status of probation and parole in Alhambra":

Text : "The status of probation and parole is at 79 percent. Efficiency level is Good."

Arthenya : "The status of probation and parole is at 79 percent. Efficiency level is Good"

The keywords within this Phrase is "what is the Status of..(Category)...in...(City)...."; this phrase will give you access to the 32 categories that are within the database associated with the city. For reference, a list of categories within the database will be provided on the next page.

Categories For Analytical Graph For B.L.A.C.C. Connect

For Profit

This will combine all businesses that are selling merchandise that is meant for the sole purpose of making money. Also, if the business is established as a for profit business it will automatically be categorized as For Profit.

Nonprofit

This will combine all businesses that are providing humanitarian aid to the Black community. Also, if the business is established as a nonprofit business it will automatically be categorized as Nonprofit.

Education

Every establishment that is meant to serve the Black community with educational information regarding housing for students, FASFA, scholarships, Financial Aid, free equipment, and etc.

Housing

Everything regarding placing Blacks within a home.

Food and Clothing

Civil Volunteering

Every volunteering program that is established and managed by Blacks.

Gambling

Within this subcategory there will be a listing of entities that operate for the purpose of providing an outlet to allow individuals to place bets, gamble and the like. Information input will be carried out by canvassers, District Coordinator and Field Coordinator.

Insurance

Within this subcategory there will be a listing of the organizations that provide insurance to the community.

Public Contractor

Licensed contractors that are employed by another subcontracting company, mostly government, school or community companies. Also, the main clients for this group are Blacks looking for public contractors for projects that are government, school or community related.

Private Contractor

Licensed contractors that are not employed by another subcontracting company. Also, the main clients for this group are Blacks looking for private contractors for personal projects that are not government, school or community related.

Utilities

This category will be composed of all basic necessities that are needed in order to maintain and operate a building.

Street/Highway Construct

Within this subcategory there will be a listing of organizations that operate for the purpose of building/remodeling streets and highways.

Music

Within this subcategory there will be a listing of the organizations that engage the community through the field of music.

TechnologyTechnology

Within this subcategory there will be a listing of any organization that is involved with the technological field. Technology will include physical items and non-physical items.

Transportation

Within this category there will be a listing of the entities that provide outlets for transportation to the community.

Finances

Within this category there will be a listing of the organizations that provide financial outlets to the community.

Mentoring

Within this Category there will be a listing of the agencies and individuals that act in the manner to build the peers and constituents around themselves within no particular field of focus.

Law

Within this subcategory there will be a listing of the organizations that utilize the Law to engage the community.

Agriculture

Within this subcategory there is a listing of the organizations and individuals that engage the community through the field of agriculture.

Labor

Within this subcategory there will be a listing of organizations that provide work with the focus of physical ability and attention span.

Revenue/Tax Advisory

Within this subcategory there will be a listing of allowed resources that operate to provide advisory information about taxes, regardless of whether the entity is For Profit or Non-Profit.

Vehicle

Within the subcategory there is a listing of the organizations that provide vehicles to the community.

Technical Trade

Every trade will be placed here.

Modeling

Within this subcategory there will be a listing of the agencies that provide resources and outlets for the modeling population.

Theater

Within this subcategory there will be a listing of the theaters within the community.

Business Mentoring

Within this Category there will be a listing of the agencies and individuals that act in the manner to build the peers and constituents around themselves within the business environment.

Professional Mentoring

Within this Category there will be a listing of the agencies and individuals that act in the manner to build the peers and constituents around themselves within a professional environment.

Family Resource

Within this subcategory there will be a listing of the resources that are focused on the assistance of those within the family population.

Health and Medical

Within this subcategory there will be a listing of the agencies that provide medical assistance to the community.

Probation and Parole

Within this subcategory there is a listing of all organizations, which includes governmental and nongovernmental, that provide assistance to the probation and parole population.

Government Resources

Within this subcategory there will be a listing of the agencies that identify as a government entity that provide resources to the community.

Water

Within this subcategory there is a listing of the organization that provides water to the community.

Research

The research operator will give a detailed description of the category that is defined in the Phrase; but if the city is just mentioned, A.S.E. will display all information within all categories inside the city. For example,

.....

Phrase : "research the details on Alhambra"

Text : "The status is at 79 percent. Efficiency level is Good."

Arthenya : "The status is at 79 percent. Efficiency level is Good"

.....

Phrase : "research the details on agriculture in Alhambra"

Text : "The status of agriculture is at 79 percent. Efficiency level is Good."

Arthenya : "The status of agriculture is at 79 percent. Efficiency level is Good"

.....

The keywords within this Phrase is “research the details on..(Category)...in...(City)....”; this phrase will give you access to the 32 categories that are within the database associated with the city.

Feedback

The feedback operator is designed to give the user commentary on what valuable knowledge can be obtained from the information. This operator can be used through the following Phrase

.....

Phrase : "what feedback would you provide on Alhambra":

Text : "The status is at 79 percent. Efficiency level is Good.";

Arthenya : "The status is at 79 percent. Efficiency level is Good"

.....

Phrase : "what feedback would you provide on agriculture in Alhambra"

Text : "The status of agriculture is at 79 percent. Efficiency level is Good."

Arthenya : "The status of agriculture is at 79 percent. Efficiency level is Good"

.....

The keywords within this Phrase is “what feedback would you provide on..(Category)...(in)...(City)...”; this phrase will give you access to the 32 categories that are within the database associated with the city.

Engagement

The engagement operator is tailored to the user’s ASE and user's ability and knowledge to thrive in the conditions or situation that might arise from the navigation through the land. It is important to understand the connection between user’s ASE and B.L.A.C.C. Ark, which will provide underlying knowledge of why the user’s A.S.E. is providing the user with the engagement information. The engagement operator can be called using the following Phrase:

.....

Phrase : "what would you advise when engaging Alhambra"

Text : "I have not processed that information yet, but there is an overall 79% efficiency within Alhambra. So, if you are at least a high level two, navigation throughout the area should not be difficult.."

Arthenya : "I have not processed that information yet, but there is an overall 79% efficiency within Alhambra. So, if you are at least a high level two, navigation throughout the area should not be difficult"

.....

Phrase : "what would you advise when engaging agriculture in Alhambra"

Text : "I have not processed that information yet, but there is an overall 79% efficiency within Alhambra. So, if you are at least a high level two, navigation throughout the area should not be difficult.."

Arthenya : "I have not processed that information yet, but there is an overall 79% efficiency within Alhambra. So, if you are at least a high level two, navigation throughout the area should not be difficult"

.....

The keywords within this Phrase is "what would you advise when engaging..(Category)...(in)...(City)...."; this phrase will give you access to the 32 categories that are within the database associated with the city.

*Unincorporated Communities Within
District 1, 2, 3, 4 and 5 of Los Angeles, California*

Within Los Angeles County there are five districts, which have a select group of unincorporated communities that encompasses the district. For instance, the first District within Los Angeles has the community Angelino Heights, within this community there will be four operations that will be able to be accessed. These four operators are Status, Research, Feedback and Engagement.

IMPORTANT : Reference pages 30 - 40 in order to understand how to use Phrases

B.L.A.C.C. Corporation

After using the Phrase' "access Ace", the user will be able to access the BLACC Corporation departments and the intellectual property that is incorporated under the department.

B.L.A.C.C. Corporation, with the alias B.L.A.C.C., was established in the State of California on June 16, 2020 for the purpose of creating inventions to incorporate under B.L.A.C.C. Corporation as Intellectual Property. The fields that B.L.A.C.C. focus on Biology, Language, Architecture, Computer Science and Change (Humanitarian Work). Stevie W. Carpenter academic background stems from my A.A. of Liberal Arts: Mathematics and Science, A.A. of Liberal Arts: Social and Behavioral Science, A.A. of Liberal Arts: Arts and Humanities, B.S. of Neurobiology w/ minor in Statistics.

New Nexxus was the first invention incorporated under B.L.A.C.C. in 2020, which is a networking system made for the Student Government of The United States. This idea evolved from my involvement in the Student Government as Senator of Activities and Planning, Executive of Outreach and Vice President of Los Angeles City College.

Shares within B.L.A.C.C. started at the Volume of 20,000,000; throughout expansion of B.L.A.C.C. The Volume of shares is 130,000,000. The price of a single share in the first quarter of 2020 started at .001; in the last quarter of 2023 the price of a single share is .0683

Portions of property and shares within B.L.A.C.C. is owned by Stevie W. Carpenter, investors, inventors, the Public, B.L.A.C.C. Board Members and B.L.A.C.C. Connect Officers. B.L.A.C.C. is hosted on a private Linux server created by Stevie W. Carpenter using Node.js on GoogleChrome V8 Javascript Engine. Files initiated in the recent third party server (w3Spaces) will be securely transferred to the private server by the end of the first quarter of 2024.

B.L.A.C.C. owns several domains being; B.L.A.C.C. now has the ability to create and manage domains, along with creating the HTML, CSS, JavaScript source code for the website to be hosted on the domain.

Businesses in partnership with B.L.A.C.C., will have a portion of the server dedicated to hosting a domain (examplebusiness.blaccorporation.com or examplebusiness.blaccorp.com) addressing the public with their future plans.

B.L.A.C.C. has released another invention known as B.L.A.C.C. Connect. B.L.A.C.C. Connect, due to its complexity; in short, the system is the B.L.A.C.C. Government Network.

Grants for B.L.A.C.C. Connect has been secured through B.L.A.C.C., which will help fund classes that will be taught by B.L.A.C.C. Connect Educators in order to give the youth practical working knowledge and experience. Portions of the grant will be issued to backpay, payroll and maintenance for the upkeep of B.L.A.C.C. Connect.

Biology

B.L.A.C.C. Ark

Carl Jung can cross an iconic realization within the reality that we experience that he termed an “Archetype”. The basic definition that I give that will explain the meaning of an archetype is a collection of characteristics that are so common amongst an object that it develops its own unique identity within our reality even though there can be many denominations.

OneiroNet

The studying of dreams is an obstacle with many pathways, which could lead to a labyrinth of approaches. Within the research field of dreams there have been iconic “scholars” like Sigmund Freud,

James Hillman and even Carl Jung at some occasions, but nevertheless each approach to studying the aspects of dreams lead to different approaches and information. The vital part to understand about this labyrinth of approaches, once a path is taken the original route back to the beginning becomes blurred due to previous convictions in personal beliefs. This aspect can be seen between Sigmund Freud and James Hillman, where Sigmund Freud dedicated his studying of dreams to their interpretation within the Living World, rather James Hillman studies focused on how to navigate within the Dream State.

Neurobiology is a field that I have personally chosen for the sole purpose of understanding the brain's operations that influence dreams, vision and memory. During my studies I have come to the fork in the road, Sigmund Freud or James Hillman; from my personal experience I believe that the James Hillman approach is more holistic and will advance society through introducing different possibilities within reality. The literature book that influenced me toward this insight is titled, "The Dream And The Underworld" by James Hillman.

OneiroNet is a database that contains the different embraceable energies that could be experienced during sleep. Within each embraceable energy, there will be four aspects that will help as a catalyst to influence the Dream State. These four aspects are External Objective Sensory Stimuli, Internal Subjective Sensory Stimuli, Internal Organic Physical Excitation and Psychic Exciting Source.

The data collected within this research project derives its source from first-hand experience and recorded interviews from volunteers. The research approach can be obtained through contacting Stevie W. Carpenter, due to ownership of the data.

Asclepieion Of B.L.A.C.C.

Asclepieion Of B.L.A.C.C. elaborates on the building blocks to cultivate a holistic approach to being a community. Within communities there are eight pillars known to be consistent with building a healthy community which encompasses Monetary Gain, Resources, Advisory/Counseling, Donate Outgoing, Donate Receiving, Entertainment,

Food/Water/Housing/Clothing and Transportation. The eight pillars of building a community is composed of different material embedding an unique aspect into the community. Altering the material that is composed of each pillar will change the unique ability of the community, in addition giving valuable intel on what strengths and weaknesses the community may undergo during certain time periods. Within this Subject Topic, there will be Study Modules, Visual Modules, Research Modules and Project Modules to help students understand the pillars of Asclepieion and the materials that cultivate the pillars.

Vital Mathematics

Need assistance with basic algebra, intermediate algebra, geometry, trigonometry, college algebra, or statistics? Vital Mathematics, the free educational website provided by B.L.A.C.C. Academy under B.L.A.C.C. Corporation. With pre-recorded videos uploaded weekly, Vital Mathematics offers a wealth of material for all levels of math learners. As someone with 10 years of teaching experience in mathematics, I can attest to the quality of the material available on Vital Mathematics. In response to the recent passing of AB705 and the even more concerning AB1705, Vital Mathematics is a valuable resource for students and educators alike. Enhance your math skills with Vital Mathematics. Within this Subject Topic, there will be Study Modules,

Visual Modules, Research Modules and Project Modules to help students understand basic Algebra, Intermediate Algebra, Geometry, Trigonometry, college Algebra, or Statistics.

Architecture

Blacklining

NFT

Non-Fungible Tokens are advancing at an increasing exponential rate that has room for more innovation with the unique art and digital design. With artists already under B.L.A.C.C.

Cooperation, steps to create and brainstorm new NFTs will be the ultimate goal for students with artistic skills. Within this Subject Topic, there will be Study Modules, Visual Modules, Research Modules and Project Modules to help increase understanding or reinforce skills.

B.L.A.C.C. Connect

The amount of money donated to resources that are allocated throughout the cities for individuals experiencing hardships passed the trillions, with no sign of fixing the problems of our society.

These hardships encompass homelessness, food insecurity, water shortages, government brutality, Healthcare access and much more. Businesses that are created to gain profit from the

communities are being created in surplus, with little to no contribution to the surrounding communities. The individuals that inhabit the community are using their hard earned money to invest into a business's products that will never invest into the community as the business should, and majority of times businesses do not have the humanitarian vision in their plans or foresight.

The educational resources that are essential tools to creating a better quality of life are ignored because no promise is found within the educational institutions today due to outdated teachings. Counseling is a resource that everyone should utilize but the stigma of this resource has made attending a session most uncomfortable, all to avoid social judgment from peers. B.L.A.C.C. Connect provides a holistic approach to navigating and foreseeing help to those groups (individual, business, city, county, state) that are experiencing hardship.

B.L.A.C.C. Connect with the help of small business, nonprofits, resources centers, government agencies and everything alike can solve problems bombarding our communities by isolating each issue to its respective groups (individual, business, city, county, state) and utilizing the B.L.A.C.C. Connect networks to navigate necessary resources adequately.

Mathematical Operations

After accessing the ASE, the user can utilize mathematical equations and outlines in order to conduct statistical or algebraic significance with information acquired or through BLACC Connect. There are currently four subjects that are stored within the ASE memory vault which are Statistics, Algebra, Geometry and Trigonometry. Within each subject there are several topics that can be accessed which are

Statistics

- Descriptive Statistics
 - Organizing and Summarizing Data
 - Producing Data
- Probability
- Statistical Distributions
 - Random Variable
 - Binomial Distributions
 - Geometric Distributions
 - Sampling Distributions
- Statistical Inference Overview
 - Inference With z Distributions
 - Inference with t Distributions
 - Inference for Populations
- Chi Square Procedures
- Linear Regression and Correlation

Algebra

- One Variable Equations and Inequalities
- Linear Equations, Functions and Graphs
- Sequences
- System of Equations
- Two Variable Inequalities
- Functions
 - Absolute Value Equations, Functions and Inequalities
 - Quadratic Equations and Functions
 - Polynomial Expressions, Equations and Functions

Exponential and Logarithmic Functions
Radical Equations and Functions
Rational Expressions, Equations and Functions
Trigonometric Functions

Geometry

Area of Rectangle
Area of Triangle
Area of Circle

Trigonometry

Cosine

A Dictionary with all Phrases in regard to Mathematical Operations will be viewed and downloadable through the link provided within this section.

Security

Location

Within the A.S.E. there will be a space within the memory vault that will give the location of any city with additional information on what other cities are near. Use the following Phrase below to invoke the action :

Phrase : "where is Alhambra"

Text : "Alhambra is in Los Angeles California of District 1 next to Monterey Park and San Gabriel."

Arthenya : "Alhambra is in Los Angeles California of District 1 next to Monterey Park and San Gabriel"

In addition, the B.L.A.C.C. Connect network will open and present the location physically.

Politicians

Within the A.S.E. there will be a space within the memory vault that will give the identity and affiliation of any State Assembly member, Senator or State Representative with every state..

Use the following Phrase below to invoke the action :

Phrase : "who are Imperial State Assembly members in California"

Text : "Report : Eduardo Garcia, who is also a Democrat holding Seat 36"

Arthenya : "Eduardo Gacia, who is also a Democrat holding Seat 36."

In addition, there will be a side window that will display a visual of the politician along with the affiliations and contact information to the main office.

Phrase : "who is Eduardo Garcia":

Text : "Report : Eduardo Garcia is also a Democrat holding Seat 36";

Arthenya : "Eduardo Garcia is also a Democrat holding Seat 36."

In addition, there will be a side window that will display a visual of the politician along with the affiliations and contact information to the main office.

Public Servant Background Check

Within the A.S.E. system there will be a database that will have the police badge number that can identify their job history and any other vital information that should be known when interacting, because truth be told; you're asking a stranger to help you. So, the solution to this issue is to ask for their name and badge number when they ask for your information, when they start to search your information use the A.S.E. to search their information using the following Phrase :

Phrase : "officer Carter 78345"

Text : "Report : This Officer has several complaints within district two. The charges brought against this officer is so and so"

Arthenya : "Report : This Officer has several complaints within district two. The charges brought against this officer are so and so. This Officer cant be trusted, bad reputation."

In addition, there will be a side window that will display a visual of the officer along with the affiliations and contact information to the main office.

Alert

Within the A.S.E. there will be a space within the memory vault that will give alerts of any city with additional information on what other cities are going through. The alerts are providing information on the subcategories within the city that is being investigated. Use the following Phrase below to invoke the action :

Phrase : "alert me of agriculture in Alhambra":

Text : "The status of agriculture is at 79 percent. Efficiency level is Good."

The action will invoke an alert box giving the following details :

"The status of agriculture is at 79 percent. Efficiency level is Good"

Phrase : "alert me of Alhambra":

Text : "The status is at 79 percent. Efficiency level is Good."

The action will invoke an alert box giving the following details :

"The status is at 59 percent. Efficiency level is Below Average");

Objective Reminder

The Mother Connection will collect information that is distributed within the personal A.S.E. of each user. The compiled information will be accessed in order to provide missions that will benefit the Archetype of the user. The Objective Reminder will have all accepted missions with quick access to understand any details that may have been forgotten. Once the mission is complete, it will be removed from the objective reminder of the user's A.S.E. The objective reminder has two portions to the way it functions, the first aspect is the reading of any objective reminders; then, the second aspect is a visual of the listing with details that will be displayed within a separate window that can be closed once done. The user will not be able to add or delete objective reminders from their ASE, each objective reminder is placed or removed based on accepted mission and completed or failed missions. In order to provoke the first aspect of the objective reminder use the following Phrase :

Phrase : "open objective reminder"

text = ".....All Objectives will be displayed within the text section....."

Arthenya : ".....All Objectives will be spoken by ASE...."

In order to provoke the second aspect of the objective reminder use the following Phrase :

Phrase : "display objective reminder"

Action : = ".....All Objectives will be displayed within a separate window...."

Commands

Within the A.S.E. system there are certain Keywords that can invoke an action from the A.S.E. These are called commands, which are embedded into the A.S.E. system from the Mother Connection. There are three commands that can be invoked which are open, compare and message. Below will explain the function of each command and what Phrase to use in order to invoke an action.

Open

Using this Keyword will automatically open a lone window with what was asked from the ASE. For example, using the Phrase : "open Compton "; will invoke the A.S.E. to open the BLACC Connect network displaying what is on Compton. Use the following Phrase to activate the open command :

Phrase : "open agriculture in Alhambra"

Text : "Okay. Stand by."

Arthenya : "Okay. Stand by."

Action : The A.S.E. will open a window displaying the information pertaining to agriculture in Alhambra.

Phrase : "open Alhambra"

Text : "Okay. Stand by."

Arthenya : "Okay. Stand by."

Action : The A.S.E. will open a window displaying all information pertaining to Alhambra.

Compare

With the following compare command, the user will be able to compare different objects, entities, people and so forth based on the numerical values that are associated with each object, entities, people and so forth. It only makes sense to understand what is being compared before trying to compare both objects, because comparing two objects that are not of similar backgrounds can present some confusing and disturbing information. In order to invoke the compare command use the following Phrase :

Phrase : "compare level 1 archetype to Alhambra"

Text : "compare level 1 archetype to Alhambra."

Arthenya : "Give me a minute to calculate the probabilities."

Action : A separate window will open displaying the comparative information, without providing any feedback on how to interpret the information; that is left to your discretion. So, when utilizing this command the user be honest with the data and not foresee information that isn't present.

The key to utilizing this Phrase at will is to remember the following :

"compare...(First object)....to...(Second object)."

Message

The user's A.S.E. system provides a messaging system that can be used if connected to the internet. The user will only be able to communicate with other user's A.S.E. If a user's A.S.E is not connected to another user's A.S.E., there will not be a messaging connection that will allow exchange of messages. Once a firm connection is made between users' A.S.E., they will be able to use Phantom Texting. Phantom Texting is a benefit of allowing users to communicate through their A.S.E. in real time. For example, when Phantom Texting is used one user types a message and the other user will be able to see the message as it is being typed. The second user will then respond, and the first user can see the message as it's being typed in real time. The first user will then erase their first message and respond to the second user's message. The previous message will not be able to be viewed once erased or something else is typed. It's like having a phone call but with just words. In order to invoke Message with a user to use Phantom Texting, use the following Phrase :

Phrase : "message Sonney"

Text : "Welcome"

Arthenya : "Welcome")

Action : Phantom Texting Window Open.

Research

Within the user's personal ASE, the ASE and the Mother Connection there will be a memory vault that will hold all researched information. Each system mentioned above will have different information to provide about what is being asked, but the information is only accessible through the user's level and rank. Not all information within the ASE and Mother Connection will be searchable by everyone. Categories within research are :

- Animals
- Mechanical
- Firearms
- Physics
- Chemistry
- Neurobiology
- World Information
- Computer Science
- Books

along with other categories that are contributed by other users.

More Editions will be sent out through the A.S.E. system to keep the users updated on all functions A.S.E.

The End. Until Next Time.

- Stevie W. Carpenter
